SZ-Connect

As part of the SmartZone Software Suite, SZ-Connect enables data center managers to build and view end-to-end connectivity of IT network devices. SZ-Connect provides the ability to capture the capacity of switches and utilization and availability of switch ports. When used with PViQ™ Patch Panels, Intelligence Modules, and PViQ™ Patch Cords, this SZ-Connect provides guided moves, adds and changes, as well as guided patch cord tracing.

Common Uses

- Visualization of end-to-end device connectivity and device status.
- Captures changes in network connectivity and automatically updates the database providing an accurate representation of connectivity status for quicker change planning and issue resolution.
- Searches availability of switch and panel ports for increased agility.
- Pairs with PViQ for immediate notification of unplanned connects or disconnects for increased security.
