

SZ-Enviro

As part of the SmartZone™ Software Suite, SZ-Enviro provides data center manager centralized visibility of the temperature and humidity environmental sensors throughout the datacenter space. Real-time events and notifications based on user defined thresholds are available to alert users or potential risks. SZ-Enviro allows for the representation of rack and cabinets temperature and humidity to be viewed on a color-changing floor plan. The combination of these features provides data center managers insight into environmental conditions that may pose risks within their data center.

Common Uses

- Monitors rack and cabinet environmental conditions.
- Sets thresholds for notifications and alerts to reduce the risk of unplanned downtime and cost implications.

SZ-Enviro

Capabilities

- Sets rack inlet temperature, humidity warning, and critical thresholds.
- Sets alert notification templates and recipients.
- Receives warning and critical alert notifications.

Customer Value

- Reduces downtime risk and cost.
- Analyzes trends for potential issues.

Latest Values: Temperature (°C) by Rack
